Yazan Abd Alrazak

Nationality: Palestinian (Autonomous Palestinian Territories) **Date of birth:** 15/06/2005

Place of birth: Damascus, Syria **Gender:** Male **Phone number:** (+963) 0932437469

Email address: yazanabdalrazak26@gmail.com

Home: sham qudsia, Damascus (Syria)

ABOUT ME

Frontend Developer with 2+ years of experience building responsive web applications using React and TypeScript.
Passionate about creating clean, maintainable code and delivering exceptional user experiences.
Strong problem-solving skills with a keen eye for performance optimization. Currently seeking mid-level React developer positions where I can contribute to challenging projects and continue growing as a developer. Key strengths:

- Building full-featured applications from concept to deployment
- Implementing modern UI/UX patterns and responsive designs
- Optimizing application performance and user experience
- Collaborating effectively in team environments.

SKILLS

Microsoft Office / Microsoft Word / Social Media / Frontend: React, TypeScript, Tailwind / Tools: Git, VS Code / Backend: Laravel , php

EDUCATION AND TRAINING

Bachelor's in ITE

Damascus University [13/11/2023 – Current]

City: Damascus | **Country:** Syria

PROJECTS

GitHub Issue Tracker built a full-featured issue tracker using GitHub's REST API. Implemented pagination with page caching, real-time filtering and sorting, and a drag-and-drop Kanban board. Added favorites system with localStorage persistence. Used React Query for efficient data fetching and caching and Built a drag-and drop task management board with three columns (To Do, In Progress, Done). Implemented persistent storage using localStorage so tasks survive page refresh. Features include smooth drag-and-drop animations and responsive design.

[Current]

TMDB Movie Search Created a responsive movie and TV show search application using
The Movie Database API. Implemented infinite scroll with virtual scrolling for optimal performance. Features include search, grid layout, rating display, and media type filtering (movies/TV shows).

FRAMEWORKS & LIBRARIES

E-Commerce Website (Learning Project) learning project focused on implementing core e-commerce functionality including product listing, cart management, and checkout flow. Currently being improved with better UI/UX and additional features .Key features implemented:

- Product catalog with filtering
- Add to cart / remove from cart
- Cart total calculation
- Responsive product grid

Next improvements planned:

- User authentication
- Order history
- Payment integration simulation

Frontend Frameworks & Libraries

- React.js (Hooks, Context, Custom Hooks)
- React Query (TanStack Query) - Data fetching, caching
- React Router DOM - Navigation
- Redux Toolkit / Zustand (Currently learning - exploring as lighter Redux alternative) - State management

UI & Styling

- Tailwind CSS - Utility-first styling
- CSS Modules
- FontAwesome - Icons

Drag & Drop

- DnD Kit - Drag-and-drop functionality

Build Tools & Environment

- Vite
- TypeScript
- ESLint
- npm / yarn

Testing

- Vitest
- React Testing Library

LANGUAGE SKILLS

Mother tongue(s): Arabic

Other language(s):

English

LISTENING B2 **READING** B2 **WRITING** B1

SPOKEN PRODUCTION B1 **SPOKEN INTERACTION** B1

Levels: A1 and A2: Basic user; B1 and B2: Independent user; C1 and C2: Proficient user

WORK EXPERIENCE

Medical Online Testing Platform

Technologies used: React, Firebase (Auth, Firestore), Tailwind CSS

Built a web application for a doctor to create and manage online tests for medical students. Implemented user authentication for doctors and students. Features include test creation, question bank management, student responses tracking, and automated scoring.

Key features:
- Doctor dashboard for see the marks of each student
- authentication for doctor and students

Technical highlights:
- Firebase Firestore for real-time data storage
- Firebase Authentication for user roles (doctor/student)

SOFT SKILLS

About me

- I don`t care about the salary or how much I only care about learning and working with team and professionals
- Problem-solving - Debugged complex issues independently
- Attention to detail - Clean code, proper TypeScript types
- Self-learning - Learned React Query, DnD Kit, Tailwind independently
- Time management - Completed 3 full projects in 3 months
- Persistence - Debugged issues without giving up
